Spa Mount Table Assembly

January 2017

1. Turn tabletop upside down on a non-scratching surface.

2. Install spa mount corbel to underside of table top – flush corbel to rear of table using 2" screws

3. Mount table with corbels attached to spa just under spa shell lip using 2" screws. The number of corbels will depend on the width of the table. There will be at least 2 corbels. Tables with a cutout for a cover lifter may require a table leg to support the rear of the table.

Spa Mount Table with Corner – continue from above

1. Mount center corbel 2 1/4" below spa shell lip.
2. Place corner on top of center corbel and slide into alignment with the straight table – not that table and corner share a corbel. Also, depending on radius of corner, corbel may not be aligned with edge of corner table.
