Assembly and mounting instructions for Drink Caddy & Towel Posts

To attach handle to drink caddy.

1. Run the two 4.5" screws into the pre-drilled holes at the bottom of the drink caddy until the points of the screws stick through the board about 1/8th to 1/4 inch.
2. Position the handle on the top of the caddy so that you can feel the points of the screws are aligned with the pilot holes in the handle.
3. While holding the handle firmly against the caddy, run the screws the rest of the way in to secure it.

To mount the towel posts* and drink caddy to the spa.

1. Determine where you want the unit on the spa
2. The small brackets on the sides of the posts will support the caddy and so must face inwards, towards the space between the two towel posts.
3. Attach one of the posts to the spa with 2.5" screws. The mounting base should be up to the lip of the spa shell and should be plumb.
4. Use the drink caddy to set the space between the posts before you mount the second post. Allow about an extra 1/4" between the caddy and the second post, then screw the second post to the spa as you did the first.

* When mounting towel post only, use step 3.
